Iñaki Maiz
Ikusi CEO

At Ikusi, as **specialists in digitalization and cybersecurity**, we have specialized in turning technology into an enabling tool that we put at the service of our clients business.

INTRODUCTION

We are specialists in digitalization and cybersecurity. We have specialized in turning technology into an enabling tool that we put at the service of our clients business.

We deploy solid, robust, scalable and secure network infrastructures, on which we build solutions and services that make efficient and improve the critical processes of companies and organizations in highly competitive sectors such as Retail, Industry or Finance, which need to constantly create value.

Based on our experience in network infrastructures and our proven capacity for technology integration, we have **specialized in providing critical services to customers**, which directly affect the operation of their business.

We have a highly qualified, professional and service-oriented team. We have executed multiple projects in the main companies in **Mexico, Spain and Colombia**, and some of them have been our clients for more than 20 years.

At Ikusi, we have been developing a deep knowledge and specialization of our clients' businesses for more than 50 years. A capital asset to understand the needs of companies in this new scenario, and accompany them in their digitization and digital transformation processes, always with the goal of "making the complex simple".

ABOUT IKUSI

Ikusi deploys integration, engineering and technological development services for the digital transformation of businesses. It works together with clients to understand the peculiarities of their business and, from there, make it evolve using the full potential of technology and associated services.

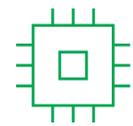

Ikusi is part of Velatia, an international industrial and technological group that operates in the field of electrical networks, electronics and communication networks, as well as in consulting, security and aeronautics sectors where safety, efficiency and reliability are valued.

Ikusi is a technology services company, specialized in the field of digitalization and cybersecurity.
